CA04 Footnotes

<http://www.bea.gov/regional/reis/default.cfm?selTable=CA04>

Legend / Footnotes:

1/ Nonfarm personal income is total personal income less farm income.

2/ Farm income is farm earnings less farm employer contributions for social insurance.

3/ Census Bureau midyear population estimates. Estimates for 2010-2014 reflect county population estimates available as of March 2015.

4/ Per capita personal income is total personal income divided by total midyear population.

5/ Employer contributions for government social insurance are included in earnings by industry and earnings by place of work, but they are excluded from net earnings by place of residence and personal income. EI contributions are subtractions in the calculation of net earnings by place of residence and all of the income measures.

6/ The adjustment for residence is the net inflow of the earnings of interarea commuters. For the United States, it consists of adjustments for border workers and US residents employed by international organization

7/ Rental income of persons includes the capital consumption adjustment.

8/ Includes actual employer contributions and actuarially imputed employer contributions to reflect benefits accrued by defined benefit pension plan participants through service to employers in the current period.

9/ Proprietors' income includes the inventory valuation adjustment and the capital consumption adjustment.

Note-- All dollar estimates are in current dollars (not adjusted for inflation).

Last updated: November 19, 2015-- new estimates for 2014; revised estimates for 1969-2013.

COUNTY NONFARM PERSONAL INCOME GROWTH QUOTIENT
I.C. 6-1.1-17-3.5
DATE PREPARED: July 7, 2016
COUNTY: ALLEN COUNTY

Step 1a: Determine calendar year county nonfarm personal income for each of the six preceeding years			Annual Allen Nonfarm Personal Income	Percent From 2007	Change To 2008	Calculation	
	Year						
	0	2008	12,722,608.0	2007	2008		
Step 1b: Calculate the annual percent change for each of the six preceding years	1	2009	12,110,503.0	2008	2009	-0.048	
	2	2010	12,398,402.0	2009	2010	0.024	
	3	2011	13,172,843.0	2010	2011	0.062	
	4	2012	13,801,981.0	2011	2012	0.048	
	5	2013	13,774,765.0	2012	2013	-0.002	
	6	2014	14,480,189.0	2013	2014	0.051	
Step 2: Sum the results of Step 1b	0.135						
Step 3: Divide the results of Step 2 by six	0.023						
SIX YEAR AVERAGE GROWTH	0.023	or	2.300%

CA04 Footnotes

<http://www.bea.gov/regional/reis/default.cfm?selTable=CA04>

Legend / Footnotes:

1/ Nonfarm personal income is total personal income less farm income.

2/ Farm income is farm earnings less farm employer contributions for social insurance.

3/ Census Bureau midyear population estimates. Estimates for 2010-2014 reflect county population estimates available as of March 2015.

4/ Per capita personal income is total personal income divided by total midyear population.

5/ Employer contributions for government social insurance are included in earnings by industry and earnings by place of work, but they are excluded from net earnings by place of residence and personal income. Employee and self-employed contributions are subtractions in the calculation of net earnings by place of residence and all of the income measures.

6/ The adjustment for residence is the net inflow of the earnings of interarea commuters. For the United States, it consists of adjustments for border workers and US residents employed by international organizations and foreign embassies.

7/ Rental income of persons includes the capital consumption adjustment.

8/ Includes actual employer contributions and actuarially imputed employer contributions to reflect benefits accrued by defined benefit pension plan participants through service to employers in the current period.

9/ Proprietors' income includes the inventory valuation adjustment and the capital consumption adjustment.

Note-- All dollar estimates are in current dollars (not adjusted for inflation).

Last updated: November 19, 2015-- new estimates for 2014; revised estimates for 1969-2013.

COUNTY NONFARM PERSONAL INCOME GROWTH QUOTIENT
I.C. 6-1-1-17-3.5
DATE PREPARED: July 7, 2016
COUNTY: BLACKFORD COUNTY

Step 1a: Determine calendar year county nonfarm
personal income for each of the six preceeding years

Step 1b: Calculate the annual percent change for
each of the six preceding years

Step 2: Sum the results of Step 1b
Step 3: Divide the results of Step 2 by six

SIX YEAR AVERAGE GROWTH

Year		Annual Blackford Nonfarm Personal Income	Percent From 2007	Change To 2008	Calculation
0	2008	391,577.0	2007	2008	
1	2009	376,575.0	2008	2009	-0.038

Total employment	10,348	10,024	9,863	9,721	9,980	9,975	10,020
Wage and salary employment	5,826	5,539	5,572	5,456	5,698	5,773	5,770
Proprietors employment	4,522	4,485	4,291	4,265	4,282	4,202	4,250

<http://www.bea.gov/regional/reis/default.cfm?selTable=CA04>

1/ Nonfarm personal income is total personal income less farm income.
2/ Farm income is farm earnings less farm employer contributions for social insurance.
3/ Census Bureau midyear population estimates. Estimates for 2010-2014 reflect county population estimates available as of March 2015.
4/ Per capita personal income is total personal income divided by total midyear population.
5/ Employer contributions for government social insurance are included in earnings by industry and earnings by place of work, but they are excluded from net earnings by place of residence and personal income. Employee and self-employed contributions are subtractions in the calculation of net earnings by place of residence and all of the income measures.
6/ The adjustment for residence is the net inflow of the earnings of interarea commuters. For the United States, it consists of adjustments for border workers and US residents employed by international organizations and foreign embassies.
7/ Rental income of persons includes the capital consumption adjustment.
8/ Includes actual employer contributions and actuarially imputed employer contributions to reflect benefits accrued by defined benefit pension plan participants through service to employers in the current period.
9/ Proprietors' income includes the inventory valuation adjustment and the capital consumption adjustment.
Note-- All dollar estimates are in current dollars (not adjusted for inflation).
Last updated: November 19, 2015-- new estimates for 2014; revised estimates for 1969-2013.

COUNTY NONFARM PERSONAL INCOME GROWTH QUOTIENT
I.C. 6-1.1-17-3.5
DATE PREPARED: July 7, 2016
COUNTY: CASS COUNTY

Step 1a: Determine calendar year county nonfarm personal income for each of the six preceeding years		Year	Annual Cass Nonfarm Personal Income	Percent From 2007	Change To 2008	Calculation
Step 1b: Calculate the annual percent change for each of the six preceding years		0	2008	1,158,516.0	2007	
		1	2009	1,108,263.0	2008	-0.043

CA04 Footnotes

<http://www.bea.gov/regional/reis/default.cfm?selTable=CA04>

Legend / Footnotes:

- 1/ Nonfarm personal income is total personal income less farm income.
 - 2/ Farm income is farm earnings less farm employer contributions for social insurance.
 - 3/ Census Bureau midyear population estimates. Estimates for 2010-2014 reflect county population estimates available as of March 2015.
 - 4/ Per capita personal income is total personal income divided by total midyear population.
 - 5/ Employer contributions for government social insurance are included in earnings by industry and earnings by place of work, but they are excluded from net earnings by place of residence and personal income. Employee and self-employed contributions are subtractions in the calculation of net earnings by place of residence and all of the income measures.
 - 6/ The adjustment for residence is the net inflow of the earnings of interarea commuters. For the United States, it consists of adjustments for border workers and US residents employed by international organizations and foreign embassies.
 - 7/ Rental income of persons includes the capital consumption adjustment.
 - 8/ Includes actual employer contributions and actuarially imputed employer contributions to reflect benefits accrued by defined benefit pension plan participants through service to employers in the current period.
 - 9/ Proprietors' income includes the inventory valuation adjustment and the capital consumption adjustment.
- Note-- All dollar estimates are in current dollars (not adjusted for inflation).
- Last updated: November 19, 2015-- new estimates for 2014; revised estimates for 1969-2013.

COUNTY NONFARM PERSONAL INCOME GROWTH QUOTIENT

CA04 Footnotes

<http://www.bea.gov/regional/reis/default.cfm?selTable=CA04>

Legend / Footnotes:

- 1/ Nonfarm personal income is total personal income less farm income.
 - 2/ Farm income is farm earnings less farm employer contributions for social insurance.
 - 3/ Census Bureau midyear population estimates. Estimates for 2010-2014 reflect county population estimates available as of March 2015.
 - 4/ Per capita personal income is total personal income divided by total midyear population.
 - 5/ Employer contributions for government social insurance are included in earnings by industry and earnings by place of work, but they are excluded from net earnings by place of residence and personal income. Employee and self-employed contributions are subtractions in the calculation of net earnings by place of residence and all of the income measures.
 - 6/ The adjustment for residence is the net inflow of the earnings of interarea commuters. For the United States, it consists of adjustments for border workers and US residents employed by international organizations and foreign embassies.
 - 7/ Rental income of persons includes the capital consumption adjustment.
 - 8/ Includes actual employer contributions and actuarially imputed employer contributions to reflect benefits accrued by defined benefit pension plan participants through service to employers in the current period.
 - 9/ Proprietors' income includes the inventory valuation adjustment and the capital consumption adjustment.
- Note-- All dollar estimates are in current dollars (not adjusted for inflation).
- Last updated: November 19, 2015-- new estimates for 2014; revised estimates for 1969-2013.

COUNTY NONFARM PERSONAL INCOME GROWTH QUOTIENT
I.C. 6-1.1-17-3.5
DATE PREPARED: July 7, 2016
COUNTY: ELKHART COUNTY

Step 1a: Determine calendar year county nonfarm personal income for each of the six preceeding years			Annual Elkhart Nonfarm Personal Income	Percent From 2007	Change To 2008	Calculation	
	Year						
	0	2008	6,093,192.0	2007	2008		
Step 1b: Calculate the annual percent change for each of the six preceding years	1	2009	5,768,068.0	2008	2009	-0.053	
	2	2010	6,060,533.0	2009	2010	0.051

CA04 Footnotes

<http://www.bea.gov/regional/reis/default.cfm?selTable=CA04>

Legend / Footnotes:

1/ Nonfarm personal income is total personal income less farm income.

2/ Farm income is farm earnings less farm employer contributions for social insurance.

3/ Census Bureau midyear population estimates. Estimates for 2010-2014 reflect county population estimates available as of March 2015.

4/ Per capita personal income is total personal income divided by total midyear population.

5/ Employer contributions for government social insurance are included in earnings by industry and earnings by place of work, but they are excluded from net earnings by place of residence and personal income. Employee and self-employed contributions are subtractions in the calculation of net earnings by place of residence and all of the income measures.

6/ The adjustment for residence is the net inflow of the earnings of interarea commuters. For the United States, it consists of adjustments for border workers and US residents employed by international organizations and foreign embassies.

7/ Rental income of persons includes the capital consumption adjustment.

8/ Includes actual employer contributions and actuarially imputed employer contributions to reflect benefits accrued by defined benefit pension plan participants through service to employers in the current period.

9/ Proprietors' income includes the inventory valuation adjustment and the capital consumption adjustment.

Note-- All dollar estimates are in current dollars (not adjusted for inflation).

Last updated: November 19, 2015-- new estimates for 2014; revised estimates for 1969-2013.

CA04 Footnotes

<http://www.bea.gov/regional/reis/default.cfm?selTable=CA04>

Legend / Footnotes:

- 1/ Nonfarm personal income is total personal income less farm income.
 - 2/ Farm income is farm earnings less farm employer contributions for social insurance.
 - 3/ Census Bureau midyear population estimates. Estimates for 2010-2014 reflect county population estimates available as of March 2015.
 - 4/ Per capita personal income is total personal income divided by total midyear population.
 - 5/ Employer contributions for government social insurance are included in earnings by industry and earnings by place of work, but they are excluded from net earnings by place of residence and personal income. Employee and self-employed contributions are subtractions in the calculation of net earnings by place of residence and all of the income measures.
 - 6/ The adjustment for residence is the net inflow of the earnings of interarea commuters. For the United States, it consists of adjustments for border workers and US residents employed by international organizations and foreign embassies.
 - 7/ Rental income of persons includes the capital consumption adjustment.
 - 8/ Includes actual employer contributions and actuarially imputed employer contributions to reflect benefits accrued by defined benefit pension plan participants through service to employers in the current period.
 - 9/ Proprietors' income includes the inventory valuation adjustment and the capital consumption adjustment.
- Note-- All dollar estimates are in current dollars (not adjusted for inflation).
- Last updated: November 19, 2015-- new estimates for 2014; revised estimates for 1969-2013.

COUNTY NONFARM PERSONAL INCOME GROWTH QUOTIENT
I.C. 6-1.1-17-3.5
DATE PREPARED: July 7, 2016
COUNTY: GREENE COUNTY

Step 1a: Determine calendar year county nonfarm personal income for each of the six preceeding years			Annual Greene Nonfarm Personal Income	Percent From 2007	Change To 2008	Calculation	
	Year						
Step 1b: Calculate the annual percent change for each of the six preceeding years	0	2008	976,878.0	2007	2008		
	1	2009	979,995.0	2008	2009	0.003

CA04 Footnotes

<http://www.bea.gov/regional/reis/default.cfm?selTable=CA04>

Legend / Footnotes:

- 1/ Nonfarm personal income is total personal income less farm income.
 - 2/ Farm income is farm earnings less farm employer contributions for social insurance.
 - 3/ Census Bureau midyear population estimates. Estimates for 2010-2014 reflect county population estimates available as of March 2015.
 - 4/ Per capita personal income is total personal income divided by total midyear population.
 - 5/ Employer contributions for government social insurance are included in earnings by industry and earnings by place of work, but they are excluded from net earnings by place of residence and personal income. Employee and self-employed contributions are subtractions in the calculation of net earnings by place of residence and all of the income measures.
 - 6/ The adjustment for residence is the net inflow of the earnings of interarea commuters. For the United States, it consists of adjustments for border workers and US residents employed by international organizations and foreign embassies.
 - 7/ Rental income of persons includes the capital consumption adjustment.
 - 8/ Includes actual employer contributions and actuarially imputed employer contributions to reflect benefits accrued by defined benefit pension plan participants through service to employers in the current period.
 - 9/ Proprietors' income includes the inventory valuation adjustment and the capital consumption adjustment.
- Note-- All dollar estimates are in current dollars (not adjusted for inflation).
- Last updated: November 19, 2015-- new estimates for 2014; revised estimates for 1969-2013.

COUNTY NONFARM PERSONAL INCOME GROWTH QUOTIENT

I.C. 6-1.1-17-3.5

DATE PREPARED: July 7, 2016

COUNTY: HARRISON COUNTY

Step 1a: Determine calendar year county nonfarm personal income for each of the six preceeding years			Annual Harrison Nonfarm	Percent	Change		
	Year		Personal Income	From	To	Calculation	
Step 1b: Calculate the annual percent change for each of the six preceeding years	0	2008	1,267,062.0	2007	2008

CA04 Footnotes

<http://www.bea.gov/regional/reis/default.cfm?selTable=CA04>

Legend / Footnotes:

- 1/ Nonfarm personal income is total personal income less farm income.
 - 2/ Farm income is farm earnings less farm employer contributions for social insurance.
 - 3/ Census Bureau midyear population estimates. Estimates for 2010-2014 reflect county population estimates available as of March 2015.
 - 4/ Per capita personal income is total personal income divided by total midyear population.
 - 5/ Employer contributions for government social insurance are included in earnings by industry and earnings by place of work, but they are excluded from net earnings by place of residence and personal income. Employee and self-employed contributions are subtractions in the calculation of net earnings by place of residence and all of the income measures.
 - 6/ The adjustment for residence is the net inflow of the earnings of interarea commuters. For the United States, it consists of adjustments for border workers and US residents employed by international organizations and foreign embassies.
 - 7/ Rental income of persons includes the capital consumption adjustment.
 - 8/ Includes actual employer contributions and actuarially imputed employer contributions to reflect benefits accrued by defined benefit pension plan participants through service to employers in the current period.
 - 9/ Proprietors' income includes the inventory valuation adjustment and the capital consumption adjustment.
- Note-- All dollar estimates are in current dollars (not adjusted for inflation).
- Last updated: November 19, 2015-- new estimates for 2014; revised estimates for 1969-2013.

COUNTY NONFARM PERSONAL INCOME GROWTH QUOTIENT
I.C. 6-1.1-17-3.5
DATE PREPARED: July 7, 2016
COUNTY: HUNTINGTON COUNTY

Step 1a: Determine calendar year county nonfarm personal income for each of the six preceeding years			Annual Huntington Nonfarm Personal Income	Percent From 2007	Change To 2008	Calculation	
	Year						
Step 1b: Calculate the annual percent change for each of the six preceeding years	0	2008	1,153,663.0	2007	2008		
	1	2009	1,113,235.0	2008	2009	-0.035

Legend / Footnotes:

- 1/ Nonfarm personal income is total personal income less farm income.
 - 2/ Farm income is farm earnings less farm employer contributions for social insurance.
 - 3/ Census Bureau midyear population estimates. Estimates for 2010-2014 reflect county population estimates available as of March 2015.
 - 4/ Per capita personal income is total personal income divided by total midyear population.
 - 5/ Employer contributions for government social insurance are included in earnings by industry and earnings by place of work, but they are excluded from net earnings by place of residence and personal income. Employee and self-employed contributions are subtractions in the calculation of net earnings by place of residence and all of the income measures.
 - 6/ The adjustment for residence is the net inflow of the earnings of interarea commuters. For the United States, it consists of adjustments for border workers and US residents employed by international organizations and foreign embassies.
 - 7/ Rental income of persons includes the capital consumption adjustment.
 - 8/ Includes actual employer contributions and actuarially imputed employer contributions to reflect benefits accrued by defined benefit pension plan participants through service to employers in the current period.
 - 9/ Proprietors' income includes the inventory valuation adjustment and the capital consumption adjustment.
- Note-- All dollar estimates are in current dollars (not adjusted for inflation).
- Last updated: November 19, 2015-- new estimates for 2014; revised estimates for 1969-2013.

COUNTY NONFARM PERSONAL INCOME GROWTH QUOTIENT

I.C. 6-1.1-17-3.5

DATE PREPARED: July 7, 2016

COUNTY: JAY COUNTY

CA04 Footnotes

<http://www.bea.gov/regional/reis/default.cfm?selTable=CA04>

Legend / Footnotes:

- 1/ Nonfarm personal income is total personal income less farm income.
 - 2/ Farm income is farm earnings less farm employer contributions for social insurance.
 - 3/ Census Bureau midyear population estimates. Estimates for 2010-2014 reflect county population estimates available as of March 2015.
 - 4/ Per capita personal income is total personal income divided by total midyear population.
 - 5/ Employer contributions for government social insurance are included in earnings by industry and earnings by place of work, but they are excluded from net earnings by place of residence and personal income. Employee and self-employed contributions are subtractions in the calculation of net earnings by place of residence and all of the income measures.
 - 6/ The adjustment for residence is the net inflow of the earnings of interarea commuters. For the United States, it consists of adjustments for border workers and US residents employed by international organizations and foreign embassies.
 - 7/ Rental income of persons includes the capital consumption adjustment.
 - 8/ Includes actual employer contributions and actuarially imputed employer contributions to reflect benefits accrued by defined benefit pension plan participants through service to employers in the current period.
 - 9/ Proprietors' income includes the inventory valuation adjustment and the capital consumption adjustment.
- Note-- All dollar estimates are in current dollars (not adjusted for inflation).
- Last updated: November 19, 2015-- new estimates for 2014; revised estimates for 1969-2013.

COUNTY NONFARM PERSONAL INCOME GROWTH QUOTIENT

CA04 Footnotes

<http://www.bea.gov/regional/reis/default.cfm?selTable=CA04>

Legend / Footnotes:

- 1/ Nonfarm personal income is total personal income less farm income.
 - 2/ Farm income is farm earnings less farm employer contributions for social insurance.
 - 3/ Census Bureau midyear population estimates. Estimates for 2010-2014 reflect county population estimates available as of March 2015.
 - 4/ Per capita personal income is total personal income divided by total midyear population.
 - 5/ Employer contributions for government social insurance are included in earnings by industry and earnings by place of work, but they are excluded from net earnings by place of residence and personal income. Employee and self-employed contributions are subtractions in the calculation of net earnings by place of residence and all of the income measures.
 - 6/ The adjustment for residence is the net inflow of the earnings of interarea commuters. For the United States, it consists of adjustments for border workers and US residents employed by international organizations and foreign embassies.
 - 7/ Rental income of persons includes the capital consumption adjustment.
 - 8/ Includes actual employer contributions and actuarially imputed employer contributions to reflect benefits accrued by defined benefit pension plan participants through service to employers in the current period.
 - 9/ Proprietors' income includes the inventory valuation adjustment and the capital consumption adjustment.
- Note-- All dollar estimates are in current dollars (not adjusted for inflation).
- Last updated: November 19, 2015-- new estimates for 2014; revised estimates for 1969-2013.

COUNTY NONFARM PERSONAL INCOME GROWTH QUOTIENT
I.C. 6-1.1-17-3.5
DATE PREPARED: July 7, 2016
COUNTY: LAKE COUNTY

Step 1a: Determine calendar year county nonfarm personal income for each of the six preceeding years			Annual Lake Nonfarm	Percent From	Change To	Calculation	
	Year		Personal Income				
	0	2008	16,852,555.0	2007	2008		
Step 1b: Calculate the annual percent change for each of the six preceding years	1	2009	16,445,197.0	2008	2009	-0.024

 - 6/ The adjustment for residence is the net inflow of the earnings of interarea commuters. For the United States, it consists of adjustments for border workers and US residents employed by international organizations and foreign embassies.
 - 7/ Rental income of persons includes the capital consumption adjustment.
 - 8/ Includes actual employer contributions and actuarially imputed employer contributions to reflect benefits accrued by defined benefit pension plan participants through service to employers in the current period.
 - 9/ Proprietors' income includes the inventory valuation adjustment and the capital consumption adjustment.
- Note-- All dollar estimates are in current dollars (not adjusted for inflation).
- Last updated: November 19, 2015-- new estimates for 2014; revised estimates for 1969-2013.

COUNTY NONFARM PERSONAL INCOME GROWTH QUOTIENT
I.C. 6-1.1-17-3.5
DATE PREPARED: July 7, 2016
COUNTY: MARION COUNTY

Step 1a: Determine calendar year county nonfarm
personal income for each of the six preceding years

Year		Annual Marion Nonfarm Personal Income	Percent From	Change To	Calculation
0	2008	32,871,080.0	2007	2008	
1	2009	31,883,430.0	2008	2009	-0.030
2	2010	32,646,241.0	2009	2010	0.024
3	2011	34,354,838.0	2010	2011	0.052
4	2012	36,044,814.0	2011	2012	0.049
5	2013	35,968,571.0	2012	2013	-0.002
6	2014	37,428,289.0	2013	2014	0.041

Step 2: Sum the results of Step 1b

0.134

Step 3: Divide the results of Step 2 by six

0.022

SIX YEAR AVERAGE GROWTH

0.022 or 2.200%

Marion

CA04 Footnotes

<http://www.bea.gov/regional/reis/default.cfm?selTable=CA04>

Legend / Footnotes:

1/ Nonfarm personal income is total personal income less farm income.

2/ Farm income is farm earnings less farm employer contributions for social insurance.

3/ Census Bureau midyear population estimates. Estimates for 2010-2014 reflect county population estimates available as of March 2015.

4/ Per capita personal income is total personal income divided by total midyear population.

5/ Employer contributions for government social insurance are included in earnings by industry and earnings by place of work, but they are excluded from net earnings by place of residence and personal income.

Employee and self-employed contributions are subtractions in the calculation of net earnings by place of residence and all of the income measures.

6/ The adjustment for residence is the net inflow of the earnings of interarea commuters. For the United States, it consists of adjustments for border workers and US residents employed by international organizations and foreign embassies.

7/ Rental income of persons includes the capital consumption adjustment.

8/ Includes actual employer contributions and actuarially imputed employer contributions to reflect benefits accrued by defined benefit pension plan participants through service to employers in the current period.

9/ Proprietors' income includes the inventory valuation adjustment and the capital consumption adjustment.

Note-- All dollar estimates are in current dollars (not adjusted for inflation).

Last updated: November 19, 2015-- new estimates for 2014; revised estimates for 1969-2013.

CA04 Footnotes

<http://www.bea.gov/regional/reis/default.cfm?selTable=CA04>

Legend / Footnotes:

- 1/ Nonfarm personal income is total personal income less farm income.
 - 2/ Farm income is farm earnings less farm employer contributions for social insurance.
 - 3/ Census Bureau midyear population estimates. Estimates for 2010-2014 reflect county population estimates available as of March 2015.
 - 4/ Per capita personal income is total personal income divided by total midyear population.
 - 5/ Employer contributions for government social insurance are included in earnings by industry and earnings by place of work, but they are excluded from net earnings by place of residence and personal income. Employee and self-employed contributions are subtractions in the calculation of net earnings by place of residence and all of the income measures.
 - 6/ The adjustment for residence is the net inflow of the earnings of interarea commuters. For the United States, it consists of adjustments for border workers and US residents employed by international organizations and foreign embassies.
 - 7/ Rental income of persons includes the capital consumption adjustment.
 - 8/ Includes actual employer contributions and actuarially imputed employer contributions to reflect benefits accrued by defined benefit pension plan participants through service to employers in the current period.
 - 9/ Proprietors' income includes the inventory valuation adjustment and the capital consumption adjustment.
- Note-- All dollar estimates are in current dollars (not adjusted for inflation).
- Last updated: November 19, 2015-- new estimates for 2014; revised estimates for 1969-2013.

COUNTY NONFARM PERSONAL INCOME GROWTH QUOTIENT
I.C. 6-1.1-17-3.5
DATE PREPARED: July 7, 2016
COUNTY: MONROE COUNTY

Step 1a: Determine calendar year county nonfarm personal income for each of the six preceeding years			Annual Monroe Nonfarm Personal Income	Percent From 2007	Change To 2008	Calculation	
	Year						
Step 1b: Calculate the annual percent change for each of the six preceeding years	0	2008	4,289,205.0	2007	2008		
	1	2009	4,143,561.0	2008	2009		-0.034

CA04 Footnotes

<http://www.bea.gov/regional/reis/default.cfm?selTable=CA04>

Legend / Footnotes:

- 1/ Nonfarm personal income is total personal income less farm income.
 - 2/ Farm income is farm earnings less farm employer contributions for social insurance.
 - 3/ Census Bureau midyear population estimates. Estimates for 2010-2014 reflect county population estimates available as of March 2015.
 - 4/ Per capita personal income is total personal income divided by total midyear population.
 - 5/ Employer contributions for government social insurance are included in earnings by industry and earnings by place of work, but they are excluded from net earnings by place of residence and personal income. Employee and self-employed contributions are subtractions in the calculation of net earnings by place of residence and all of the income measures.
 - 6/ The adjustment for residence is the net inflow of the earnings of interarea commuters. For the United States, it consists of adjustments for border workers and US residents employed by international organizations and foreign embassies.
 - 7/ Rental income of persons includes the capital consumption adjustment.
 - 8/ Includes actual employer contributions and actuarially imputed employer contributions to reflect benefits accrued by defined benefit pension plan participants through service to employers in the current period.
 - 9/ Proprietors' income includes the inventory valuation adjustment and the capital consumption adjustment.
- Note-- All dollar estimates are in current dollars (not adjusted for inflation).
- Last updated: November 19, 2015-- new estimates for 2014; revised estimates for 1969-2013.

COUNTY NONFARM PERSONAL INCOME GROWTH QUOTIENT

I.C. 6-1.1-17-3.5

DATE PREPARED: July 7, 2016

COUNTY: NEWTON COUNTY

Step 1a: Determine calendar year county nonfarm personal income for each of the six preceeding years

Step 1b: Calculate the annual percent change for each of the six preceding years

Step 2: Sum the results of Step 1b
Step 3: Divide the results of Step 2 by six

CA04 Footnotes

<http://www.bea.gov/regional/reis/default.cfm?selTable=CA04>

Legend / Footnotes:

- 1/ Nonfarm personal income is total personal income less farm income.
 - 2/ Farm income is farm earnings less farm employer contributions for social insurance.
 - 3/ Census Bureau midyear population estimates. Estimates for 2010-2014 reflect county population estimates available as of March 2015.
 - 4/ Per capita personal income is total personal income divided by total midyear population.
 - 5/ Employer contributions for government social insurance are included in earnings by industry and earnings by place of work, but they are excluded from net earnings by place of residence and personal income. Employee and self-employed contributions are subtractions in the calculation of net earnings by place of residence and all of the income measures.
 - 6/ The adjustment for residence is the net inflow of the earnings of interarea commuters. For the United States, it consists of adjustments for border workers and US residents employed by international organizations and foreign embassies.
 - 7/ Rental income of persons includes the capital consumption adjustment.
 - 8/ Includes actual employer contributions and actuarially imputed employer contributions to reflect benefits accrued by defined benefit pension plan participants through service to employers in the current period.
 - 9/ Proprietors' income includes the inventory valuation adjustment and the capital consumption adjustment.
- Note-- All dollar estimates are in current dollars (not adjusted for inflation).
- Last updated: November 19, 2015-- new estimates for 2014; revised estimates for 1969-2013.

COUNTY NONFARM PERSONAL INCOME GROWTH QUOTIENT

CA04 Footnotes

<http://www.bea.gov/regional/reis/default.cfm?selTable=CA04>

Legend / Footnotes:

- 1/ Nonfarm personal income is total personal income less farm income.
 - 2/ Farm income is farm earnings less farm employer contributions for social insurance.
 - 3/ Census Bureau midyear population estimates. Estimates for 2010-2014 reflect county population estimates available as of March 2015.
 - 4/ Per capita personal income is total personal income divided by total midyear population.
 - 5/ Employer contributions for government social insurance are included in earnings by industry and earnings by place of work, but they are excluded from net earnings by place of residence and personal income. Employee and self-employed contributions are subtractions in the calculation of net earnings by place of residence and all of the income measures.
 - 6/ The adjustment for residence is the net inflow of the earnings of interarea commuters. For the United States, it consists of adjustments for border workers and US residents employed by international organizations and foreign embassies.
 - 7/ Rental income of persons includes the capital consumption adjustment.
 - 8/ Includes actual employer contributions and actuarially imputed employer contributions to reflect benefits accrued by defined benefit pension plan participants through service to employers in the current period.
 - 9/ Proprietors' income includes the inventory valuation adjustment and the capital consumption adjustment.
- Note-- All dollar estimates are in current dollars (not adjusted for inflation).
- Last updated: November 19, 2015-- new estimates for 2014; revised estimates for 1969-2013.

COUNTY NONFARM PERSONAL INCOME GROWTH QUOTIENT
I.C. 6-1.1-17-3.5
DATE PREPARED: July 7, 2016
COUNTY: PORTER COUNTY

Step 1a: Determine calendar year county nonfarm
personal income for each of the six preceeding years

Step 1b: Calculate the annual percent change for
each of the six preceding years

Step 2: Sum the results of Step 1b
Step 3: Divide the results of Step 2 by six

SIX YEAR AVERAGE GROWTH

Year		Annual Porter Nonfarm Personal Income	Percent From 2007	Change To 2008	Calculation

Legend / Footnotes:

- 1/ Nonfarm personal income is total personal income less farm income.
 - 2/ Farm income is farm earnings less farm employer contributions for social insurance.
 - 3/ Census Bureau midyear population estimates. Estimates for 2010-2014 reflect county population estimates available as of March 2015.
 - 4/ Per capita personal income is total personal income divided by total midyear population.
 - 5/ Employer contributions for government social insurance are included in earnings by industry and earnings by place of work, but they are excluded from net earnings by place of residence and personal income. Employee and self-employed contributions are subtractions in the calculation of net earnings by place of residence and all of the income measures.
 - 6/ The adjustment for residence is the net inflow of the earnings of interarea commuters. For the United States, it consists of adjustments for border workers and US residents employed by international organizations and foreign embassies.
 - 7/ Rental income of persons includes the capital consumption adjustment.
 - 8/ Includes actual employer contributions and actuarially imputed employer contributions to reflect benefits accrued by defined benefit pension plan participants through service to employers in the current period.
 - 9/ Proprietors' income includes the inventory valuation adjustment and the capital consumption adjustment.
- Note-- All dollar estimates are in current dollars (not adjusted for inflation).
- Last updated: November 19, 2015-- new estimates for 2014; revised estimates for 1969-2013.

COUNTY NONFARM PERSONAL INCOME GROWTH QUOTIENT
I.C. 6-1.1-17-3.5

CA04 Footnotes

<http://www.bea.gov/regional/reis/default.cfm?selTable=CA04>

Legend / Footnotes:

1/ Nonfarm personal income is total personal income less farm income.

2/ Farm income is farm earnings less farm employer contributions for social insurance.

3/ Census Bureau midyear population estimates. Estimates for 2010-2014 reflect county population estimates available as of March 2015.

4/ Per capita personal income is total personal income divided by total midyear population.

5/ Employer contributions for government social insurance are included in earnings by industry and earnings by place of work, but they are excluded from net earnings by place of residence and personal income. Employee and self-employed contributions are subtractions in the calculation of net earnings by place of residence and all of the income measures.

6/ The adjustment for residence is the net inflow of the earnings of interarea commuters. For the United States, it consists of adjustments for border workers and US residents employed by international organizations and foreign embassies.

7/ Rental income of persons includes the capital consumption adjustment.

8/ Includes actual employer contributions and actuarially imputed employer contributions to reflect benefits accrued by defined benefit pension plan participants through service to employers in the current period.

9/ Proprietors' income includes the inventory valuation adjustment and the capital consumption adjustment.

Note-- All dollar estimates are in current dollars (not adjusted for inflation).

Last updated: November 19, 2015-- new estimates for 2014; revised estimates for 1969-2013.

CA04 Footnotes

<http://www.bea.gov/regional/reis/default.cfm?selTable=CA04>

Legend / Footnotes:

- 1/ Nonfarm personal income is total personal income less farm income.
 - 2/ Farm income is farm earnings less farm employer contributions for social insurance.
 - 3/ Census Bureau midyear population estimates. Estimates for 2010-2014 reflect county population estimates available as of March 2015.
 - 4/ Per capita personal income is total personal income divided by total midyear population.
 - 5/ Employer contributions for government social insurance are included in earnings by industry and earnings by place of work, but they are excluded from net earnings by place of residence and personal income. Employee and self-employed contributions are subtractions in the calculation of net earnings by place of residence and all of the income measures.
 - 6/ The adjustment for residence is the net inflow of the earnings of interarea commuters. For the United States, it consists of adjustments for border workers and US residents employed by international organizations and foreign embassies.
 - 7/ Rental income of persons includes the capital consumption adjustment.
 - 8/ Includes actual employer contributions and actuarially imputed employer contributions to reflect benefits accrued by defined benefit pension plan participants through service to employers in the current period.
 - 9/ Proprietors' income includes the inventory valuation adjustment and the capital consumption adjustment.
- Note-- All dollar estimates are in current dollars (not adjusted for inflation).
- Last updated: November 19, 2015-- new estimates for 2014; revised estimates for 1969-2013.

COUNTY NONFARM PERSONAL INCOME GROWTH QUOTIENT
I.C. 6-1.1-17-3.5
DATE PREPARED: July 7, 2016
COUNTY: TIPPECANOE COUNTY

<http://www.bea.gov/regional/reis/default.cfm?selTable=CA04>

Legend / Footnotes:

- 1/ Nonfarm personal income is total personal income less farm income.
 - 2/ Farm income is farm earnings less farm employer contributions for social insurance.
 - 3/ Census Bureau midyear population estimates. Estimates for 2010-2014 reflect county population estimates available as of March 2015.
 - 4/ Per capita personal income is total personal income divided by total midyear population.
 - 5/ Employer contributions for government social insurance are included in earnings by industry and earnings by place of work, but they are excluded from net earnings by place of residence and personal income. Employee and self-employed contributions are subtractions in the calculation of net earnings by place of residence and all of the income measures.
 - 6/ The adjustment for residence is the net inflow of the earnings of interarea commuters. For the United States, it consists of adjustments for border workers and US residents employed by international organizations and foreign embassies.
 - 7/ Rental income of persons includes the capital consumption adjustment.
 - 8/ Includes actual employer contributions and actuarially imputed employer contributions to reflect benefits accrued by defined benefit pension plan participants through service to employers in the current period.
 - 9/ Proprietors' income includes the inventory valuation adjustment and the capital consumption adjustment.
- Note-- All dollar estimates are in current dollars (not adjusted for inflation).
- Last updated: November 19, 2015-- new estimates for 2014; revised estimates for 1969-2013.

CA04 Footnotes

<http://www.bea.gov/regional/reis/default.cfm?selTable=CA04>

Legend / Footnotes:

- 1/ Nonfarm personal income is total personal income less farm income.
 - 2/ Farm income is farm earnings less farm employer contributions for social insurance.
 - 3/ Census Bureau midyear population estimates. Estimates for 2010-2014 reflect county population estimates available as of March 2015.
 - 4/ Per capita personal income is total personal income divided by total midyear population.
 - 5/ Employer contributions for government social insurance are included in earnings by industry and earnings by place of work, but they are excluded from net earnings by place of residence and personal income. Employee and self-employed contributions are subtractions in the calculation of net earnings by place of residence and all of the income measures.
 - 6/ The adjustment for residence is the net inflow of the earnings of interarea commuters. For the United States, it consists of adjustments for border workers and US residents employed by international organizations and foreign embassies.
 - 7/ Rental income of persons includes the capital consumption adjustment.
 - 8/ Includes actual employer contributions and actuarially imputed employer contributions to reflect benefits accrued by defined benefit pension plan participants through service to employers in the current period.
 - 9/ Proprietors' income includes the inventory valuation adjustment and the capital consumption adjustment.
- Note-- All dollar estimates are in current dollars (not adjusted for inflation).
- Last updated: November 19, 2015-- new estimates for 2014; revised estimates for 1969-2013.

- 7/ Rental income of persons includes the capital consumption adjustment.
- 8/ Includes actual employer contributions and actuarially imputed employer contributions to reflect benefits accrued by defined benefit pension plan participants through service to employers in the current period.
- 9/ Proprietors' income includes the inventory valuation adjustment and the capital consumption adjustment.

Note-- All dollar estimates are in current dollars (not adjusted for inflation).

Last updated: November 19, 2015-- new estimates for 2014; revised estimates for 1969-2013.

COUNTY NONFARM PERSONAL INCOME GROWTH QUOTIENT
I.C. 6-1.1-17-3.5
DATE PREPARED: July 7, 2016
COUNTY: WAYNE COUNTY

Step 1a: Determine calendar year county nonfarm
personal income for each of the six preceeding years

Step 1b: Calculate the annual percent change for
each of the six preceding years

Step 2: Sum the results of Step 1b
Step 3: Divide the results of Step 2 by six

SIX YEAR AVERAGE GROWTH

	Year		Annual Wayne Nonfarm Personal Income	Percent From 2007	Change To 2008	Calculation	
	0	2008	2,107,737.0	2007	2008		
	1	2009	2,031,464.0	2008	2009	-0.036

CA04 Footnotes

<http://www.bea.gov/regional/reis/default.cfm?selTable=CA04>

Legend / Footnotes:

- 1/ Nonfarm personal income is total personal income less farm income.
 - 2/ Farm income is farm earnings less farm employer contributions for social insurance.
 - 3/ Census Bureau midyear population estimates. Estimates for 2010-2014 reflect county population estimates available as of March 2015.
 - 4/ Per capita personal income is total personal income divided by total midyear population.
 - 5/ Employer contributions for government social insurance are included in earnings by industry and earnings by place of work, but they are excluded from net earnings by place of residence and personal income. Employee and self-employed contributions are subtractions in the calculation of net earnings by place of residence and all of the income measures.
 - 6/ The adjustment for residence is the net inflow of the earnings of interarea commuters. For the United States, it consists of adjustments for border workers and US residents employed by international organizations and foreign embassies.
 - 7/ Rental income of persons includes the capital consumption adjustment.
 - 8/ Includes actual employer contributions and actuarially imputed employer contributions to reflect benefits accrued by defined benefit pension plan participants through service to employers in the current period.
 - 9/ Proprietors' income includes the inventory valuation adjustment and the capital consumption adjustment.
- Note-- All dollar estimates are in current dollars (not adjusted for inflation).
Last updated: November 19, 2015-- new estimates for 2014; revised estimates for 1969-2013.

CA04 Footnotes

<http://www.bea.gov/regional/reis/default.cfm?selTable=CA04>

Legend / Footnotes:

- 1/ Nonfarm personal income is total personal income less farm income.
 - 2/ Farm income is farm earnings less farm employer contributions for social insurance.
 - 3/ Census Bureau midyear population estimates. Estimates for 2010-2014 reflect county population estimates available as of March 2015.
 - 4/ Per capita personal income is total personal income divided by total midyear population.
 - 5/ Employer contributions for government social insurance are included in earnings by industry and earnings by place of work, but they are excluded from net earnings by place of residence and personal income. Employee and self-employed contributions are subtractions in the calculation of net earnings by place of residence and all of the income measures.
 - 6/ The adjustment for residence is the net inflow of the earnings of interarea commuters. For the United States, it consists of adjustments for border workers and US residents employed by international organizations and foreign embassies.
 - 7/ Rental income of persons includes the capital consumption adjustment.
 - 8/ Includes actual employer contributions and actuarially imputed employer contributions to reflect benefits accrued by defined benefit pension plan participants through service to employers in the current period.
 - 9/ Proprietors' income includes the inventory valuation adjustment and the capital consumption adjustment.
- Note-- All dollar estimates are in current dollars (not adjusted for inflation).
- Last updated: November 19, 2015-- new estimates for 2014; revised estimates for 1969-2013.
